DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nolen et al. (US 5,732,447).

A hook (10) has at one end of the hook a reversible first bight (24). The first bight is sufficiently opposite of the hook and has at its other end a second reversible bight (26). The second bight is sufficiently opposite of the first bight and sufficiently in length to be operational (Figs. 1-6).

Response to Arguments

3. Applicant's arguments filed 13 October 2005 have been fully considered but they are not persuasive.

4. In response to Applicant's argument that Nolan discloses a device having a hook and a button bend that includes additional structure not required by Applicant's invention, it must be noted that the button bend is not considered additional structure

since the two bights provided to make the button bend are being used as the first bight and the second bight being recited in the claims especially since the claim is only requiring a hook with two bights.

5. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "the bights are in a relatively planar position and the bungee adjuster could not function properly if the bights were in a nonplanar position.") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). However, the claim fails to have a combination with a bungee cord and the claim only recites that the first bight is sufficiently opposite to the hook (first bend portion 24 is on the sufficiently opposite to the hook 16 about the longitudinal member extending between 16 and 24) and a second bight being sufficiently opposite to the first bight (the second bight 26 is sufficiently opposite to the first bight 24 when taken about the longitudinal member 26).

6. Therefore, claim 1 stands rejected under 35 U.S.C. 102(b) as being anticipated by Nolen et al.

7. Applicant's arguments, see remarks, filed 13 October 2005, with respect to claim 1 being rejected under 35 U.S.C. 102(b) as being anticipated by Reed (US 4,997,222) have been fully considered and are persuasive. The rejection of claim 1 as being anticipated by Reed has been withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Reed (US 4,997,222) and Nolen et al. (US 5,732,447) are cited to show state of the art with respect to hooks having a first and second bights that are opposite to each other.
